Things to do when using MHE in an ELEVATOR

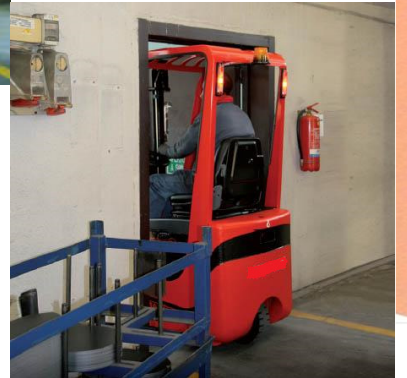

- Do not use a forklift truck in any elevator unless specifically authorized to do so.
- Before entering any elevator, make sure that the capacity of the elevator is designed to carry a forklift.
- Consider the factors such as clearance for machine entry, ventilation and weight including the load on forks does not exceed the elevator's capacity
- Approach the elevator slowly, stop at a safe distance from the elevator gate and enter squarely

DORTMUND & HUBBARD (L.L.C.)

- Do not do any harsh/jumpy movements such as harsh braking, harsh turning & fast hydraulics
- Always switch ON your lights and the beacon lights while entering/exiting the elevator
- Watch the elevator ground to align with the floor for smooth entry/exit
- Neutralize the forklift controls, shut off the motor, and apply the brakes, in case of shifting the machines through elevator
